SUPPLEMENTAL RESTRICTION

Please note: There has been a change in Examiner from Maurie Garcia Baker to Jon D. Epperson

1. The Amendment dated on September 25, 2003, is acknowledged (see Paper No. 28).
2. Upon further review of Applicant's newly added claims, an additional restriction and/or election of species was deemed necessary (see below).
3. The Examiner further notes that the Amendment dated September 25, 2003 (Paper No. 28) was not fully responsive to the prior Office action because of the following omission(s) or matter(s): Applicants failed to indicate which of the newly added claims read on the elected species (see Paper No. 24, paragraph 10).

Species Election

4. Applicant is required to elect from the following patentably distinct species below.
Applicant must elect one species from each subgroup below. Claim 77 is generic

Subgroup 1: Species of microscope (see claim 79)

Applicant must elect for purposes of search a single species of confocal microscope wherein each element of the microscope is set forth e.g., the microscope in claim 79. Furthermore, Applicants must indicate what the "data acquisition" means are i.e., Applicants must indicate whether the microscope has 1 or 2 detectors and whether it uses one or two color filters.

Subgroup 2: Species of compound of general particles (see claim 84)

Art Unit: 1639

Applicant must elect for purposes of search a single species of particle e.g., virus, bacteria. Please note that if Applicant elects a generic term like aggregate or complex, Applicant must indicate what the aggregate or complex is made from e.g., aggregate of bacteria.

Subgroup 3: Species of measurement volume restriction (see claim 96)

Applicant must elect for purposes of search a single species of particle e.g., elements of near field optical microscopy. Furthermore, Applicants must further disclose which "elements" are being used.

5. **Please note:** applicant must indicate which claims read on the elected species above.
6. The species are distinct, each from the other, because their structures and modes of action are different. They would also differ in their reactivity and the starting materials from which they are made. For different species of method, the method steps for each species would differ. Moreover, the above species can be separately classified. Consequently, the species have different issues regarding patentability and represent patentably distinct subject matter. Therefore, this does create an undue search burden, and election for examination purposes as indicated is proper.
7. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.
8. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 1639

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

9. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

10. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

11. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Because the above restriction/election requirement is complex, a telephone call to applicants to request an oral election was not made. See MPEP § 812.01.

12. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1639

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

13. Applicant is also reminded that a 1 - month (not less than 30 days) shortened statutory period will be set for response when a written requirement is made without an action on the merits. This period may be extended under the provisions of 37 CFR 1.136(a). Such action will not be an "action on the merits" for purposes of the second action final program, see MPEP 809.02(a).

14. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jon D. Epperson, Ph.D. whose telephone number is (703) 308-2423. The examiner can normally be reached on Monday-Friday from 9:00 a.m. to 6:00 p.m.
